

I absolutely oppose this petition to weaken Indiana's law against telemarketing. If the FCC allows this law to change, anybody that I currently have a business relationship with (e.g., your bank, credit card company, long distance carrier) will be able to call me as often as they want - these are unwanted calls! If I need contact from my bank, credit card company, etc. then I will initiate it.

If Indiana's law is weakened, over 800,000,000 more unwanted phone calls to Indiana residents could occur in a matter of 18 months! This is unacceptable.

Please consider the that the majority of people do not want these calls!

Thank you for allowing me to comment.
